

Quick deployment unit for radiation monitoring

- Maximum protection of the first responders
- Operational after few minutes installation
- Emergency proof communication and built-in GPS
- Rechargeable battery, up to 4 years autonomy

GammaTRACER Spider is an innovative gamma monitoring solution for emergency applications.

Based on GammaTRACER's **field proven technology**, already in operation in more than 100 countries, it provides **reliable measurements**.

The GammaTRACER Spider can be installed anywhere in only a few seconds thanks its self-deployable system and feet design, **reducing**

the first responders' exposure in emergency situation.

The probe includes a satellite modem providing reliable measurements without any telecommunication networks. Its intuitive software is available with the WebVIEW interface to be used on laptop, smartphone or tablet.

Quick deployment probe

Beta and Gamma air monitoring

Monitoring system dedicated to crisis management

From one probe to turnkey solutions: your data is secured and saved in a SQL central server, as well as easily integrated in your local IT system.

DETECTION PRINCIPLE

2 GM Tubes, energy compensated H*(10)

DIMENSIONS

110 mm x 650 mr

WEIGHT

Manual stand-up : 2,2 kg

NERGY RANGE

rom 45 keV to 2 MeV

MEASUREMENT RANGE

From 20 nSv/h to 10 Sv/r

MEASUREMENT CYCL

From 1 min to 2 hours

BUILT-IN SENSORS

GPS, temperature, movement

DATA TRANSMISSION

Satellite, Radio (ShortLINK/SkvLINK)

AUTONOMY

Up to 4 years without data transmission

Bertin Technologies S.A.S • Parc d'Activités du Pas du Lac • 10 bis, avenue Ampère, 78180 Montigny Le Bretonneux, France WWW.BERTIN-INSTRUMENTS.COM
