TOMORROW'S TECHNOLOGY FOR TODAY'S SECURITY

XIS-6040N

Flexible System Design

Checkpoint Security: Small Baggage and Parcel Inspection

TRANSPORTATION

Airport entrances and perimeters,
air cargo, and checkpoint technology.

PORTS & BORDERS

Border control, sea ports, and
other large cargo sectors.

CRITICAL INFRASTRUCTURE

Access control for prisons, courthouses,
mailrooms, hotel entrances and
military bases.

The XIS-6040N X-Ray Inspection System features a tunnel opening of 60.0 cm x 40.0 cm (23.6" x 15.7"). The XIS-6040N offers a compact design with increased dimensions for a wider range of placement and expanded screening capability. The XIS-6040N is slightly narrower than our XIS-6040 and is ideal for both small parcel and checkpoint screening.

The XIS-6040N has been placed at hotels, prisons, government sites and transportation hubs. With its small frame, the XIS-6040N maintains high mobility, but with a wider tunnel size for varied application.

With a powerful 160kV generator, the XIS-6040N provides crisp, high resolution images due to its advanced software and superior processing technology.

All Astrophysics X-ray Inspection Systems are equipped with Real-Time Diagnostics, a unique Astrophysics feature which allows users to monitor system health. This software was specifically engineered to save you valuable time and money. If requested, Astrophysics would also be able to connect to your system and troubleshoot any issues remotely.

An exclusive Astrophysics option is our 6 Color Imaging, which enables operators to view screened objects in 6 colors, each color correlating to a specific range of Atomic Z-Numbers. 6 Color Imaging enables operators to achieve optimal material identification which improves throughputs.

Astrophysics is committed to providing quality products and services worldwide. We listen to our customers and offer customizations and order flexibility based on their needs.

Backed by a team of engineers from our City of Industry, California center of excellence headquarters, Astrophysics designs cutting-edge X-ray screening technology for detecting weapons and contraband for transportation, ports, borders, critical infrastructure and other industries that present security risks.

Astrophysics is headquartered in the United States and maintains a global presence with service delivery worldwide. Astrophysics is committed to global safety and is proud to present this new age of screening security—driving the industry into the technology of tomorrow.
